## **Contents**

Preface	4
Explanation of symbols	5
Area and environment	7
Population	11
Housing	23
Transport and Tourism	31
Health care	35
Social welfare	41
Education	45
Culture and leisure	51
Energy and water supply	55
City finances and personnel	59
Labour force	63
Economic activities	67
Income and consumption	71
Justice and public safety	75
Elections	79

## **Preface**

The Helsinki Statistical Yearbook of Helsinki brings together a wide range of statistics on various themes. It presents a comprehensive picture of Helsinki, its residents and development based on reliable statistical data. In addition to the statistics on Helsinki, the yearbook offers comparative statistics regarding the Helsinki Metropolitan Area, the Helsinki Region and Finland as a whole. Furthermore, the book contains separate sections on the major city regions in Scandinavia and the capitals of the Baltic States. The various themes and their development are described in a total of 247 statistical tables.

The 2023 yearbook is the 111th annual edition. Over the decades, the content of the yearbook has been revised several times, but the purpose of giving a varied description of the city and its residents based on the latest statistics remains the same.

The effects of the corona pandemic are still visible in the statistics. In 2021, Helsinki's population growth was slower than at any time since 2005. In addition, the effects of the corona pandemic can be seen in for example in the statistics of the culture and tourism sector. The Statistical Yearbook of Helsinki can be studied online (see www.hel.fi/urbanfacts). The 1905–2008 editions are available in a digital format on the City Archives database Sinetti (www.sinettiarkisto.fi). Furthermore, the tables of the yearbook are available as open data on the Helsinki Region Infoshare web service (www.hri.fi). The latter contains all the statistical tables published in the yearbook since 2002.

Additional information on many themes covered in the yearbook can be found in the statistical and research publications of the City of Helsinki Executive Office (www.hel.fi/urbanfacts). Statistics on Helsinki by districts and sub-districts are available on the Helsinki Region Area Database (www.aluesarjat.fi). The publication Helsinki by District Library of Urban Research and Statistics provides an information service related to urban research and statistics in Helsinki.

The yearbook is compiled by the Urban Research and Statistics Unit in the City Executive Office, but the statistics included in the book has been provided by many informants in the city organization and outside it. The editorial work for this year's edition was carried out by Information Service Secretary **Solja Saarto**. The layout was designed by Graphic Designer **Lotta Haglund** and prepared by Statistics Secretary **Sirkka Koski**. I want warmly thank all our cooperation partners within and outside the city administration for their invaluable contribution to the completion of the Statistical Yearbook of Helsinki 2023.

Helsinki, November 2023 **Ari Jaakola** Statistics and Information Services Manager

## **Explanation of symbols**

#### **Coefficients for monetary value**

Year	2021 currency r	ate	2022 currency rate
	Coefficient	Year	Coefficient
1995	0.2441	1995	0.2615
2000	0.2261	2000	0.2422
2005	1.2657	2005	1.3558
2010	1.1519	2010	1.2339
2018	1.0354	2019	1.0979
2019	1.0249	2020	1.0947
2020	1.0220	2021	1.0712
2021	1.0000	2022	1.0000

#### **Explanation of symbols**

Magnitude nil	-		
Magniture less than half of unit employed	0		
Data subject to secrecy			
Data not available			
Category not applicable			
Preliminary data	*		
Corrected figure	•		
Men	М		
Women	W		
A horizontal line drawn across a time series shows substantial breaks in the homogeneity of a series.			

#### Reader instructions

The book contains some data denominated in euros expressed in fixed monetary value for 2020 or 2021. This has been done in an attempt to eliminate the impacts of changes in monetary value on the figures. The cost of living index 1951:10 = 100 has been used as the **deflation coefficient**. The coefficients for different years are stated in conjunction with the symbols.

There is always a reference in conjunction with the euro-denominated data as to whether the figures have been stated in fixed monetary value for 2021 or 2022. Where no reference is stated, the euro-denominated data is in the current monetary value. Where figures are examined **in relation to the population figure**, the average population figure has been used as the population figure if the data apply to the whole year.

The year book presents **district data** in accordance with the **district division system** approved by the City Board. The district division system is at four levels with the city being divided into 8 major districts, which are subdivided into a total of 34 districts. These districts comprise sub-districts and small districts in the official district division. There are currently 148 sub-districts and 404 small areas. Each major district, district and sub-district has a code and name confirmed by the City Board and small areas have a code only. Major districts have a single-digit code from 1-8 and districts have a three-digit code, with the first digit designating the major district in which the district lies. The three-digit code of sub-districts is formed from the city area code (the two first digits) and the sub-district code (the last digit). A full list of the district names and codes in the district division system can be found with the district division map appendix.

The Helsinki Metropolitan Area comprises the cities of Helsinki, Espoo, Vantaa and Kauniainen. The Helsinki Region comprises these four cities and those of Hyvinkää, Järvenpää, Kerava, Kirkkonummi, Nurmijärvi, Sipoo, Tuusula, Vihti and, since 1 Jan. 2005, Mäntsälä and Pornainen.

#### Major districts and land use in Helsinki 2022

## **Area and environment**

## List of diagrams and tables

1.1	Area and population density by major district 2023	8
1.2	Air temperature and water-level 1995–2022	8
1.3	Respirable particles (PM,,), nitrogen dioxide and ozonein the air 2005–2022	
1.4	Green house gas emissions corresponding to consumptionin Helsinki 1990–2022	
	Water quality in certain sea areas in Helsinki	

### Area and population density by major district 2023

Major District	Ar	ea, km²	Inhabitants

Helsinki- Porkkala	Satis- factory	Satis- factory	1		Good	Good	Worse than good	1	3	

#### **Ecological classification**

Mate	erials	Grounds for classification
1	Extensive	Extensive phytoplankton chlorophyll a materials and intensive station biomass materials, growth depth of kelp in a sheltered and open coastal zone and benthic materials.
2	Extensive	Extensive phytoplankton chlorophyll a materials (passable) and quite extensive benthic materials (satisfactory).
3	Extensive	Phytoplankton chlorophyll a materials and benthic results.
4	Restricted	Phytoplankton chlorophyll materials and benthic results.
5	Restricted	Very restricted materials, water quality results from one station in 2011 and benthic information from two stations in 2011.

#### Reason for change

- The state of both biological and physico-chemical factors has deteriorated. Sea-bottom de-oxygenation and, in summer, algal bloom occur in the area.
- 2. With decreasing external loads, the bottom fauna in the area has recovered, which has improved the ecological quality rating. Waternutrient concentrations, too, have decreased.
- 3. 'The bottom fauna has recovered and become more diversified, which has improved the ecological quality rating.

#### **Chemical classification**

- 1. Evaluation of chemical state made as expert evaluations when lacking suitable materials.
- 2. Classification based on measurements, restricted materials.

<sup>&</sup>lt;sup>1</sup> Since 2009 statistics on arava and interest-subsidised dwellings account for those dwellings released from tenant income restrictions.

In 2010 Statistics Finland adjusted the tenure status of arava and interest-subsidised dwellings.
 Dwellings built using the state's short-term interest subsidy have been classified as "other rented dwellings".

Earlier. neurological rehabilitation was included in basic health care. in 2015 in somatic special health care.

Note: The number of people having received care includes all those different persons (by identity number) that received care in the years 2000–2016 at Helsin-ki City health care facilities or at those of the Hospital District of Helsinki and Uusimaa. One and the same person may have consulted several different services during any given year, but they have been counted only once for each line.

The Helsinki Statistical Yearbook compiles a wide range of statistics on various themes. It presents a comprehensive picture of Helsinki, its residents and development based on reliable statistical data. In addition to the statistics on Helsinki, the yearbook offers comparative data regarding the Helsinki Metropolitan Area, the Helsinki Region and Finland as a whole. The various themes and their development are described in a total of 247 statistical tables.
